

Cooperation, Coordination and Conflict: Handout A (Team Epsilon)

Team Member 1: Research Director, Epsilon Group

You are Research Director for Epsilon Group, a large medical research company. Your team's goal is to find out the Omega number. The Omega Number is the key in formulating a top-secret vaccine that will eradicate brain cancer. Each of your team members has a sheet with unique information to help you figure out the Omega Number. Because of security concerns, at no time can you show your unique information to your team members. All information can, however, be shared verbally. **As Team Member 1, you are the Research Director for the group and thus, should oversee that the discussion takes place in a way that will help you uncover the Omega Number. You should try to ensure that the team takes the most efficient and effective approaches to figuring out the Omega Number.**

Delta is equal to Mu plus two Thetas.

The value of alpha is 50.

Upsilon can be attained by subtracting Tau from Mu.

Gamma is thirteen times Theta.

Epsilon has the second-highest value.

Lambda has the lowest value.

**Omega is equal to Delta + Nu + Zeta + Tau + Pi.
What is the Omega number?**

Team Member 2: Facilities Officer, Epsilon Group

You are Facilities Officer for Epsilon Group, a large medical research company. Your team's goal is to find out the Omega number. The Omega Number is the key in formulating a top-secret vaccine that will eradicate brain cancer. Each of your team members has a sheet with unique information to help you figure out the Omega Number. Because of security concerns, at no time can you show your unique information to your team members. All information can, however, be shared verbally. However, other team members are keen to find out the number for themselves. They will attempt to find out your unique information use it to claim the discovery for themselves. Your task is to find out the Omega number first, before your group members do. **As the Facilities Officer, you should try to withhold as much information as possible and uncover the number before anyone else does. You should try to find the Omega Number first and avoid telling anyone about your discovery.**

Mu is equal to Xi minus Pi.

Eta is three times Rho.

A Theta is one-eighth of a Sigma.

Iota is equal to 80.

Epsilon's value is 5 less than Xi.

Pi is twice that of Delta.

**Omega is equal to Delta + Nu + Zeta + Tau + Pi.
What is the Omega number?**

Team Member 3: Project Coordinator 3, Epsilon Group

You are Project Coordinator for Epsilon Group, a large medical research company. Your team’s goal is to find out the Omega number. The Omega Number is the key in formulating a top-secret vaccine that will eradicate brain cancer.
